**Wolf Wireless Integrated Systems** combine the best of bleeding edge technology with the financial and aesthetic advantages of Digital Home Technology Integration. By incorporating your information management, entertainment, and security solutions into the physical structure of your home, Wolf Wireless Systems add resale value to your new or existing property while hiding potentially dangerous and unsightly wires, eliminating the need for external media such as CDs or DVDs, providing additional physical security for your digital content, and offering an upgradeable and cost effective modular solution that can be easily added to one room at a time.

**Digital DataSafe** Consolidate priceless digital photos, videos, music, and documents in one protected centralized location. Provide **secure access** to your digital content from the next room or the next country. **Automatically backup** every computer in your home daily so you never lose another file even if your computer is lost or damaged. **Share** photos, movies, home videos and music to your Medialess PCs or media players.

**Medialess PC** easily connect your in-the-wall Entertainment PC directly to your big screen HDTV via an HDMI interface. Access the internet or digital media saved on your Digital DataSafe or Network Attached Storage (NAS) in up to 1080p High Definition Video and 7.1 Digital Surround Sound. Play PC games access internet cameras, or run any PC program all displayed on your HDTV. Watch movies, listen to music, view photos, even surf the internet on the big screen with friends, family, and colleagues.

**Internet Cameras** Monitor your home from anywhere in the house or anywhere in the world! Keep an eye and an ear on your valuables, kids or pets while relaxing in the next room, at work, or on vacation. Record video and still

photos to your Digital DataSafe for later review. Place still or Pan-Tilt-Zoom (PTZ) cameras inside or outside. With up to 100x zoom and full 360 degree pan/ tilt, never be out of touch again!

**Network Printers** Print directly from a wireless laptop, from your Medialess PC in the comfort of your living room or bedroom, even from a remote computer via the internet. All Wolf Wireless Executive Networks include a printer that connects directly

to the network. Never worry about connecting USB cables again! Instead of having a cheap printer for every computer, invest in one quality printer and share it. Place your printer anywhere and print from everywhere!

#### DIGITAL HOME TECHNOLOGY INTEGRATION

Wolf Wireless provides the finest Digital Home Technology Integration (DHTI) Services in the world. Our patent pending solutions integrate your media and information management systems with the physical infrastructure of your home. By making technology a built-in upgradeable feature, you can add resale value to your home and take advantage of the financial benefits associated with DHTI. Because our technology solutions are legally considered fixtures just like dishwashers, light fixtures, or heating and cooling units, they can be included in appraisal value and therefore your mortgage. You wouldn't purchase a new home without light fixtures or kitchen appliances. So why purchase a home without networked entertainment, surveillance, and computer systems?

#### PHYSICAL SECURITY FOR YOUR DIGITAL FILES

Wolf Wireless solutions also provide physical security benefits for your digital content. Electronic devices including computers are the most highly sought after items of residential theft. Computers secure our most important information. From personal financial data to priceless digital photos and videos, your digital content cannot be too safe. Protect your important data with a built-in Wolf Wireless System.

#### HIDDEN CABLE MANAGEMENT

Electronic devices always seem to come with a spaghetti roll of wires, cables, and plugs. The more devices you have, the uglier it gets. Wolf Wireless systems combat this problem in two ways. First, by building the systems into the wall, power cables and connectivity wires are hidden inside the walls where they can't be seen or disturbed by children or pets. Second, Wolf Wireless systems combine the best features of multiple electronic devices into one, which significantly reduces the number of devices and remote controls required and therefore reduces power consumption. Although wireless solutions are developing to reduce cables, the connectivity is nowhere close to as fast, secure, or reliable as hard wired solutions. In-wall engineering gives you the best of both worlds by providing a fast, secure, and reliable hidden-wire solution.

#### MEDIALESS SYSTEM

As your library of DVD movies, audio CDs, software CDs and other external media grows, it can be difficult to keep them from getting scratched, misplaced, or damaged. With a Wolf Wireless System you no longer need external media. Just rip it onto your Digital DataSafe and access it from anywhere in the house or anywhere in the world! You can then organize your digital content into categories and limit access to certain types of media. Access to mature content can be easily controlled, preventing children from accessing inappropriate content.

#### INSTALLATION FOR PRE-EXISTING HOMES

Unlike other Digital Home Technology Integrators, who only install their systems during the construction process, Wolf Wireless Systems can be easily installed into a completely finished home, at no additional cost. And because the system is designed to be modular, you can easily upgrade your system over time. Add new modules or upgrade existing modules to scale your system as your home and family grow.

#### INTERNET COMPATIBILITY & CONNECTIVITY

Wolf Wireless Systems communicate using Transmission Control Protocol/ Internet Protocol (TCP/IP), the language of the internet. Unlike other communication protocols used for in-home connectivity, like Closed Circuit Television (CCTV) as well as other proprietary protocols, Wolf Wireless Systems can be securely connected directly to the internet via your broadband modem. This provides unprecedented secure accessibility from anywhere in the world via the web. Never be disconnected from your home again!

#### TECHNOLOGY INTEGRATION

Wolf Wireless Systems are designed to reduce total cost of ownership by integrating with existing technologies. Use your existing laptop or desktop computers to upload and access digital content to and from your Digital Safe, Medialess PCs, or internet cameras. Utilize your big screen television in place of separate monitors for your computers and security cameras. Even play your digital media in up to 1080p High Definition resolution in 7.1 Digital Surround Sound!
